Call for SEA-EU alliance researchers willing to (co-)mentor a research-based Master thesis of a student from one of the SEA-EU alliance universities

Dear researchers,

SEA-EU alliance is inviting you to participate in pilot action that will target MSc students. Namely, MSc students from different SEA-EU alliance countries should go on **a mobility during the summer semester in order to develop interdisciplinary research-based master thesis.**

If you are interested in participating in this activity please fill in the form below, indicating the topic of the master thesis and the expected student profile.

The pilot actions are focused on interdisciplinary thesis; however, we encourage you to fill in the form even if the topic of the research is not interdisciplinary. Namely, within the alliance we would like to increase the number of jointly developed MSc theses, so the information provided would be used for developing the matchmaking system for achieving this goal.
